Innovation and quality

Our joinery division was established nearly 50 years ago and has provided a quality product to our customers ever since. Using both modern technology and processes, and traditional craftsmanship, our directly employed operatives ensure we provide the very highest level of quality products – each and every time. Jarvis Joinery provides a comprehensive manufacture and installation service to our clients and the construction arm of the Group. They operate from large workshops in Harpenden, fully equipped with up-to-date machinery which will enable them to meet the new challenges of the 21st Century.

Committed to quality and precision

When it comes to custom joinery, getting from concept to reality is a highly-skilled job. With unparalleled expertise in working with all softwood, hardwood and panel products, we deliver results of simply superb quality and precision. From general joinery to bespoke products, you'll find we work quickly, efficiently and cost-effectively

towards an end product which lives up to our promise in every respect.

Putting the environment first

Today, caring for the environment is more important than ever. At the Jarvis Group, this recognition is at the very heart of our operational philosophy, and we are committed to minimising pollution and the waste of natural resources through the applications of best-practice principles at all levels of our organisation. Where possible our timber is purchased from managed resources and all paint products used in our spray booths are water-based. Timber waste is sent to a Materials Recycling Facility (MRF) for processing.

A century of experience

With over a century of experience in providing property-related services behind us, the Jarvis name is today synonymous with building at its best. Our commitment to quality and craftsmanship, coupled with our tradition of training, has earned us a reputation for excellence which is second to none. It's a reputation we are determined to maintain.
